PROFESSIONAL SUMMARY

Engineered platforms serving 10,000+ concurrent users — Laravel Backend Developer with 3+ years of experience building production-grade SaaS systems. Specialized in multi-tenant architecture, Role-Based Access Control (RBAC), and payment integrations. Optimized high-traffic APIs with Redis caching, reducing query latency and infrastructure costs. Experienced with PHPUnit testing, Git-based CI/CD workflows, and agile delivery across ERP, booking, and POS platforms.

PROFESSIONAL EXPERIENCE

10/2023 – Present
Palestine

Laravel Backend Developer

Approved Tech

- Architected and maintained secure, scalable backend systems for large-scale SaaS, ERP, and booking platforms used by multiple enterprise clients.
- Engineered complex database schemas and optimized high-traffic RESTful APIs, achieving measurable reductions in query response times.
- Implemented granular Role-Based Access Control (RBAC) and permission systems across multi-tenant environments, enforcing data security for 3 distinct user tiers.
- Collaborated in agile sprints, conducted structured code reviews, and wrote PHPUnit tests to ensure backend reliability and reduce regression bugs.
- Maintained CI/CD pipelines via GitHub Actions for automated testing and deployment across staging and production environments.

06/2023 – 08/2023
Palestine

Laravel Backend Developer – Internship

Approved Tech

- Completed an intensive 3-month program covering modern web development workflows and full SDLC.
- Built practical Laravel features collaborating with senior developers in a professional team environment.

EDUCATION

09/2020 – 03/2025
Palestine

Bachelor of Information Technology – Web Development

Islamic University of Gaza

Focused on advanced web technologies, database management systems, and software engineering principles. Strong foundation in backend development, OOP, and data structures.

TECHNICAL SKILLS

Backend

PHP 8+, Laravel 10+, RESTful APIs, OOP, SOLID Principles, MVC

Caching & BaaS

Redis Cache, Supabase

Architecture

Multi-Tenant SaaS, RBAC, Agile/Scrum

Tools

Git & GitHub, Postman, Apidog, Open api, AI Prompt Engineering

Databases

MySQL, Database Design & Migrations, Query Optimization

Frontend

JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Testing & CI/CD

PHPUnit, Feature & Unit Testing, GitHub Actions, CI/CD Pipelines

KEY PROJECTS

04/2025 – Present

Sufra

Restaurant Management & POS SaaS

- Developed a full-featured restaurant management and POS SaaS with a 3-tier architecture (POS, live QR menus, multi-tenant admin).
- Automated daily sales analytics and dynamic invoicing modules to streamline operations for partner restaurants.

03/2024 – Present

BookForMe

Booking & E-Commerce SaaS

- Co-developed a complex multi-user booking platform with 3 distinct portals (Admin, Partner, Client) serving multiple enterprise clients in an agile team.
- Integrated multi-currency payment gateways processing transactions across 5+ currencies, enforcing code quality via structured peer code reviews.

10/2024 – 04/2025

UOP Dashboard

University CMS

- Designed a centralized CMS for the University of Palestine managing courses, exams, announcements, and academic events.
- Implemented isolated content management modules per faculty with granular publishing controls and clean data segregation.

02/2025 – 03/2025

Taskat

Team Collaboration Platform

- Engineered a hybrid Jira/Slack platform unifying task management and communication for distributed teams.
- Reduced infrastructure costs by designing a multi-tenant workspace architecture under a single subscription model.
- Built a granular dynamic permission system supporting custom user roles across multiple concurrent projects.

01/2025 – 01/2025

NetSpeed

Network Management System

- Built and scaled a high-traffic platform serving 10,000+ concurrent active users, maintaining <200ms average API response time under peak load.
- Integrated Redis Cache to optimize complex query execution, reducing database load by ~60% and eliminating bottlenecks.
- Developed multi-tier Admin and Client portals with advanced card control, dynamic reward modules, and real-time dashboards.
